Note: The figures are generally based on the incomes of young adults (late 20s to early 30s). For Singapore, they refer to the cohorts who reached 30 years of age between 2008 and 2012 (that is, those born between 1978 and 1982). While there are some differences in the details of the various studies, these are regarded by scholars as being broadly comparable.
Singapore

No one owes Singapore a living
This is where we belong

We must preserve racial and religious harmony

We must uphold meritocracy and incorruptibility
We have confidence in our future
We must ourselves defend Singapore
