

## Traffic lights for color blindness

Suggestion for the designs of information to be displayed on traffic light for people with color blindness

---

# UNISignal

## Universal Signal Light

Traffic light is directly linked with human lives. If someone misunderstand its meaning, an accident could occur in a sudden and damages to all the people involved.

The shape of every single traffic light's in the world are same as circle.

So we suggest a different way of recognition of shape, not the color.

The Bright LED light  
help you to read

Press and hold the  
red button

The Bright LED light  
help you to read

Press and hold the  
red button

The opener fits over most bottle lids

**So unfair.**
